

MESSENGER Advanced Products (MEAPs)

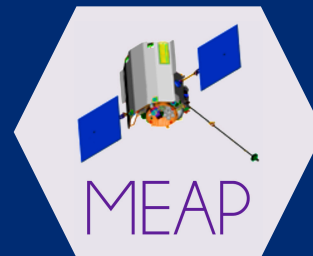

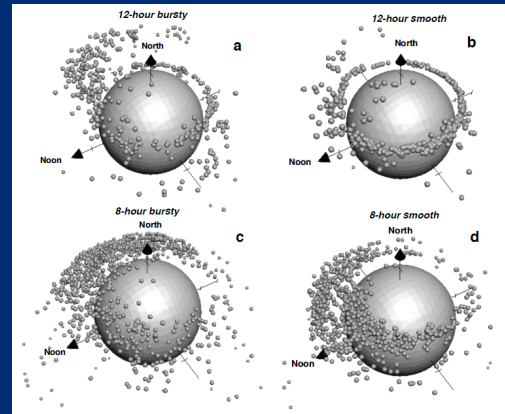

Data from the MESSENGER mission to the planet Mercury have been processed into specific data sets to enable the planetary science community to perform scientific analyses on the data.

MEAP-1 VIRS Spectral Cube of Mercury with global maps of Mercury in the infrared.

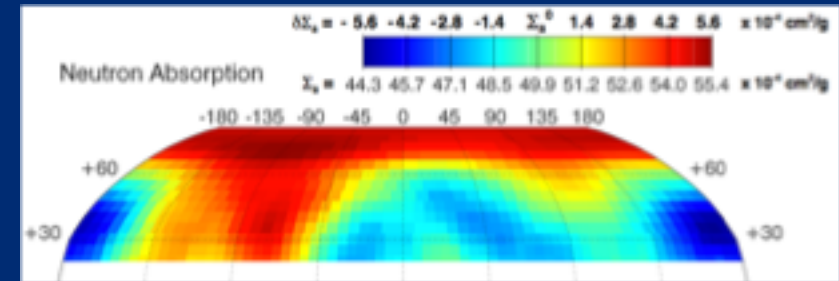

MEAP-2 UVVS Spectral Cube of ultraviolet and visible reflectance spectra as a function of position on Mercury

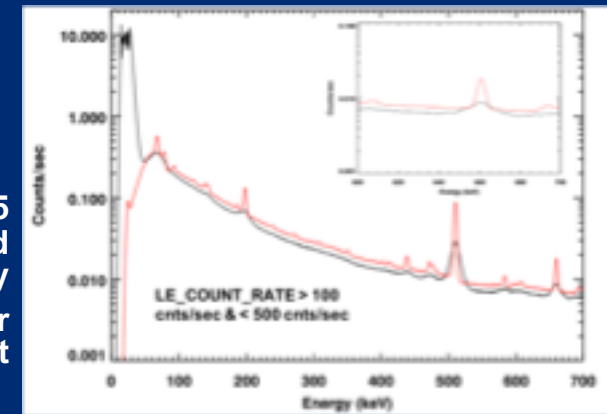

MEAP-3 Distribution of Energetic Electron Events in space and time

MEAP-4 Thermal Neutron Maps of Mercury

MEAP-5 Enhanced Gamma Ray Spectrometer Global Dataset

The MESSENGER Advanced Product (MEAP) project enhances the utility of MESSENGER data from the planet Mercury to the planetary science community.
